Abstracts

Hydraulic fluid is the energy transfer medium in all hydraulic systems. The job of hydraulic fluid goes beyond simple transmission of power. Although transmitting hydraulic energy is the core purpose of hydraulic fluid, it is useful in four secondary functions—heat transfer, contamination removal, sealing, and lubrication.

This report elaborates the market size, market characteristics, and market growth of the Hydraulic Fluids industry, and breaks down according to the type, application, and consumption area of Hydraulic Fluids. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Hydraulic Fluids in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
