Abstracts

Hydropower is one of the oldest sources of energy which was used for thousands of years ago, to turn paddle wheels that help grind grain. Hydropower is a versatile, sustainable technology and it is the world's largest source of the renewable energy and currently accounts for about 20% of the world's total electricity supply. Hydropower has one of the best of conversion of all known energy sources. Harnessing water maturely can help take electricity access to millions of people. Stable, reliable and affordable electricity supply is also crucial for driving economic growth and ending the global poverty.

This report elaborates the market size, market characteristics, and market growth of the Hydropower industry, and breaks down according to the type, application, and consumption area of Hydropower. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Hydropower in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
