Abstracts

An industrial control system is one of the different types of control systems that are used for monitoring industrial processes. It can be composed of just a few controllers or a complex network of interactive control systems made up by hundreds or thousands of connections. ICS security is concerned with: Securing and safeguarding industrial control systems, and the software and hardware used in operating and controlling machinery, and other devices used in the factory and other industrial businesses. Keeping processes and machineries running smoothly. Ensuring that the information and data shown on the control room dashboards and screens are accurate, reflecting what is really happening in the plant or production floor.

This report elaborates the market size, market characteristics, and market growth of the ICS Security industry, and breaks down according to the type, application, and consumption area of ICS Security. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for ICS Security in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
