Abstracts

Identity as a Service is an as-a-service, cloud-based subscription model for identity and access management (IAM). This means that identity and access services are rendered over the Internet by a third-party provider rather than deployed on-premises. IDaaS can contain a range of services, but typically includes single sign-on (SSO), multi-factor authentication (MFA) and directory services that provide organizations with simple and cost-effective identity and access management (IAM) capabilities.

This report elaborates the market size, market characteristics, and market growth of the Identity and Access Management industry, and breaks down according to the type, application, and consumption area of Identity and Access Management.
