Abstracts

Indicative security seals are mechanisms used to seal shipping containers in a way that provides tamper evidence and some level of security. Such seals can help to detect theft or contamination, either accidental or deliberate. Security seals are commonly used to secure truck trailers, vessel containers, chemical drums, airline duty-free trolleys and utility meters. Typically they are considered an inexpensive way of providing tamper evidence of intrusion into sensitive spaces.
This report elaborates the market size, market characteristics, and market growth of the Indicative Security Seal industry, and breaks down according to the type, application, and consumption area of Indicative Security Seal. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
