Abstracts

An air compressor is a device that converts power by using an electric motor, diesel or gasoline engine and others into potential energy which is stored as pressurized air. Air compressors function at high temperatures and in locations where explosions and fire hazards restrict forms of energy. The key components of air compressor include piston, cylinder head, valves, wall/ cooling water jacket, crank shaft, compressor casing, connecting rod, main bearings, and so on.

This report elaborates the market size, market characteristics, and market growth of the Industrial Air Compressor industry, and breaks down according to the type, application, and consumption area of Industrial Air Compressor. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
