Abstracts

Industrial chillers are systems that cool or dehumidify the air in commercial and industrial facilities. The chillers use either absorption cycle or vapor compression for cooling. There are three types of chillers, namely, air chillers, water chillers, and evaporative condensed chillers. The basic components of chillers through which the refrigerant passes include evaporators, compressors, condensers, and expansion valves.

This report elaborates the market size, market characteristics, and market growth of the Industrial Chillers industry, and breaks down according to the type, application, and consumption area of Industrial Chillers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial Chillers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
