Abstracts

Control system security is the prevention of intentional or unintentional interference with the proper operation of industrial automation and control systems. These control systems manage essential services including electricity, petroleum production, water, transportation, manufacturing, and communications. They rely on computers, networks, operating systems, applications, and programmable controllers, each of which could contain security vulnerabilities.

This report elaborates the market size, market characteristics, and market growth of the Industrial Control Systems (ICS) Security industry, and breaks down according to the type, application, and consumption area of Industrial Control Systems (ICS) Security. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial Control Systems (ICS) Security in a special period.
