Abstracts

Industrial explosives, also known as civilian explosives, are explosive mixtures composed mainly of oxidants and combustibles, in accordance with the principle of oxygen balance, and are non-ideal explosives. Industrial explosives are widely used in coal mine metallurgy, petroleum geology, transportation and hydropower, forestry construction, metal processing and controlled blasting, etc. because of their low cost, simple manufacturing and reliable application.

This report elaborates the market size, market characteristics, and market growth of the Industrial Explosives industry, and breaks down according to the type, application, and consumption area of Industrial Explosives. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial Explosives in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
