Abstracts

Industrial fasteners refer to high-quality fasteners that are used in a variety of applications, ranging from the automobile industry to maritime and construction projects. People generally use the terms 'industrial fasteners' and 'permanent fasteners' interchangeably. Both refer to the fact that the fasteners need to be able to withstand a number of weather and chemical elements (and last for many years without needing replacements).

This report elaborates the market size, market characteristics, and market growth of the Industrial Fastener industry, and breaks down according to the type, application, and consumption area of Industrial Fastener. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial Fastener in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
