Abstracts

Industrial and Collaborative Robot is a robot intended to physically interact with humans in a shared workspace. This is in contrast with other robots, designed to operate autonomously or with limited guidance, which is what most industrial robots were up until the decade of the 2010s.

This report elaborates the market size, market characteristics, and market growth of the Industrial and Collaborative Robots industry, and breaks down according to the type, application, and consumption area of Industrial and Collaborative Robots. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial and Collaborative Robots in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
