Abstracts

Industrial PC, also known as Industrial computers are somewhat similar to computers used in homes and offices as they have the same hardware components and peripheral devices. The only difference lies in their manufacturing to withstand extreme temperature, high humidity and other severe environmental conditions. An Embedded Industrial PC can be a computer embedded in a metal case or may be in the form of an all-in-one flat panel.

This report elaborates the market size, market characteristics, and market growth of the Industrial PC industry, and breaks down according to the type, application, and consumption area of Industrial PC. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial PC in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
