Abstracts

Industrial temperature controllers are devices that help in maintaining the temperature for cooling or heating processes, irrespective of the environmental temperature. This device constantly checks the temperature of the medium and adjusts it to the optimal temperature. Basic temperature acts as an on/off switch. These controllers switch off if the medium reaches the set point and start again if the temperature increases or decreases. Industrial temperature controllers are classified as single loop/multiloop temperature controllers, hybrid temperature controllers, and analog temperature controllers.

This report elaborates the market size, market characteristics, and market growth of the Industrial Temperature Controllers industry, and breaks down according to the type, application, and consumption area of Industrial Temperature Controllers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Industrial Temperature Controllers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
