Abstracts

Information rights management (IRM) is a subset of digital rights management (DRM), technologies that protect sensitive information from unauthorized access. Information rights management solutions use encryption to prevent unauthorized access. A key or password can be used to control access to the encrypted data.

This report elaborates the market size, market characteristics, and market growth of the Information Rights Management industry, and breaks down according to the type, application, and consumption area of Information Rights Management. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Information Rights Management in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
