Abstracts

Innovation management is an amalgamation of change management and management of innovation process. It refers to organizational innovation, product and business process. It comprises set of tools that permit engineers and managers to cooperate with a mutual understanding of processes and goals. Moreover, it also allows the organization to respond to internal or external opportunities and use its creativity to introduce new processes, ideas and products. It is not regulated to research and development, it encompasses workers at each level in contributing productively to a company’s marketing, product development and manufacturing.

This report elaborates the market size, market characteristics, and market growth of the Innovation Management industry, and breaks down according to the type, application, and consumption area of Innovation Management. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Innovation Management in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
