Abstracts

Insulated concrete form or insulating concrete form (ICF) is a system of formwork for reinforced concrete which is made with a rigid thermal insulation that stays in place as a permanent interior and exterior substrate for walls, floors, and roofs. The forms can be characterized into three main categories: Block, Panel and Plank, each having their own advantages.

This report elaborates the market size, market characteristics, and market growth of the Insulating Concrete Form (ICF) industry, and breaks down according to the type, application, and consumption area of Insulating Concrete Form (ICF). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Insulating Concrete Form (ICF) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
