Abstracts

Insurance analysis is the process of integrating insurance data from multiple different data sources to generate accurate, consistent, and useful information. It seamlessly detects and combines insurance data to generate improved information and provides new insights that can be shared with authorized users for better decision making. This report elaborates the market size, market characteristics, and market growth of the Insurance Analytics industry, and breaks down according to the type, application, and consumption area of Insurance Analytics. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Insurance Analytics in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
