Abstracts

The Internet of Things (IoT) world may be exciting, Middleware connects different, often complex and already existing programs that were not originally designed to be connected. The essence of the Internet of Things is making it possible for just about anything (any Thing) to be connected and to communicate data over a network. Middleware is part of the architecture enabling connectivity for huge numbers of diverse Things by providing a connectivity layer for sensors and also for the application layers that provide services that ensure effective communications among software.

This report elaborates the market size, market characteristics, and market growth of the Internet of Things (IoT) Middleware industry, and breaks down according to the type, application, and consumption area of Internet of Things (IoT) Middleware. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Internet of Things (IoT) Middleware in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
