## Abstracts

Individual quick freezing (IQF) is one of the major technology used to keep variety of vegetables. IQF or individual quick freezing is the process of quickly freezing each unit of product separately, by using cold air that is blown at a high speed on a fluidized bed. Products that are frozen using IQF technology have better flavor, texture and are more nutritious than product frozen with different methods.

This report elaborates the market size, market characteristics, and market growth of the IQF Vegetables industry, and breaks down according to the type, application, and consumption area of IQF Vegetables. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for IQF Vegetables in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
