Abstracts

Laser beam welding (LBW) is a welding technique used to join pieces of metal or thermoplastics through the use of a laser. The beam provides a concentrated heat source, allowing for narrow, deep welds and high welding rates. The process is frequently used in high volume applications using automation, such as in the automotive industry. It is based on keyhole or penetration mode welding.

This report elaborates the market size, market characteristics, and market growth of the Laser Welding Equipment industry, and breaks down according to the type, application, and consumption area of Laser Welding Equipment. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
