Abstracts

An autonomous car (also known as a driverless car and a self-driving car) is a vehicle that is capable of sensing its environment and navigating without human input. A vehicle that is capable of managing itself on a freeway journey, excluding on- and off-ramps and city driving, might be considered Level 3 automated. This level of automation requires advanced sensor packages, hardware backups and sophisticated software to keep occupants safe.

This report elaborates the market size, market characteristics, and market growth of the Level 3 Autonomous Vehicles industry, and breaks down according to the type, application, and consumption area of Level 3 Autonomous Vehicles. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
