Abstracts

Lithium-ion Battery Recycling is a recycling activity that aims to reduce the number of lithium-ion batteries being disposed as municipal solid waste. Lithium-ion batteries contain a number of heavy metals and toxic chemicals and disposing of them by the same process as regular trash has raised concerns over soil contamination and water pollution.

This report elaborates the market size, market characteristics, and market growth of the Lithium-ion Battery Recycling industry, and breaks down according to the type, application, and consumption area of Lithium-ion Battery Recycling. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
