Abstracts

LoRa contains only the link layer protocol and is perfect to be used in P2P communications between nodes. LoRa modules are a little cheaper than the LoRaWAN ones. LoRaWAN includes the network layer too so it is possible to send the information to any Base Station already connected to a Cloud platform. LoRaWAN modules may work in different frequencies by just connecting the right antenna to its socket.

This report elaborates the market size, market characteristics, and market growth of the LoRaWAN LoRa Module industry, and breaks down according to the type, application, and consumption area of LoRaWAN LoRa Module. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for LoRaWAN LoRa Module in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
