Abstracts

Man-made satellites can be made very small to reduce the huge economic costs of launch vehicles and construction-related costs. Compared with conventional satellites, the development cycle of small satellites is shorter and the development team is smaller.

This report elaborates the market size, market characteristics, and market growth of the Low-Cost Satellite industry, and breaks down according to the type, application, and consumption area of Low-Cost Satellite. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Low-Cost Satellite in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
