## **Abstracts**

M2M's full name, Machine to Machine, refers to the transfer of data from one terminal to another, that is, the dialogue between the machine and the machine. The M2M application system consists of intelligent machines, M2M hardware, communication networks, and middleware. The Internet of Things (IoT) is an information carrier such as the Internet and traditional telecommunication networks, enabling all ordinary objects that can perform independent functions to realize interconnected networks.

This report elaborates the market size, market characteristics, and market growth of the M2M and IoT industry, and breaks down according to the type, application, and consumption area of M2M and IoT. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for M2M and IoT in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
