Abstracts

Maritime VSAT is the use of satellite communication through a Very-Small-Aperture Terminal (VSAT) on a moving ship at sea. Since a ship at sea moves with the water, the antenna needs to be stabilized with reference to the horizon and True north, so that the antenna is constantly pointing at the satellite it uses to transmit and receive signals.
This report elaborates the market size, market characteristics, and market growth of the Maritime VSAT industry, and breaks down according to the type, application, and consumption area of Maritime VSAT. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Maritime VSAT in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
