Abstracts

Mastic Asphalt is the traditional choice of specifiers as a waterproofing medium because it has a long and successful history in many different situations and applications. Mastic Asphalt is made up of graded aggregates bonded together in suitable bitumen which when solid, forms a dense, voidless impermeable mass, but when heated to the correct temperature is spread by a hand float. In the hands of a BriggsAmasco craftsman it can be used to waterproof not just large flat areas but the most intricate details.

This report elaborates the market size, market characteristics, and market growth of the Mastic Asphalt industry, and breaks down according to the type, application, and consumption area of Mastic Asphalt. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Mastic Asphalt in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
