## Abstracts

Material jetting creates objects in a similar method to a two dimensional ink jet printer. Material is jetted onto a build platform using either a continuous or Drop on Demand (DOD) approach. Material is jetted onto the build surface or platform, where it solidifies and the model is built layer by layer.

This report elaborates the market size, market characteristics, and market growth of the Material Jetting (MJ) Equipment industry, and breaks down according to the type, application, and consumption area of Material Jetting (MJ) Equipment. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Material Jetting (MJ) Equipment in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
