Abstracts

Mattress springs wires are coil springs used in a mattress. Coils are primarily used in the core (support layer) of innerspring mattresses, which is their original use. In recent years small 'micro-coils' have started being used in the upholstery (comfort layer) of mattresses, primarily with a coil core ('coil-on-coil' construction), but sometimes with other core types.

This report elaborates the market size, market characteristics, and market growth of the Mattress Spring Wire industry, and breaks down according to the type, application, and consumption area of Mattress Spring Wire. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Mattress Spring Wire in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
