Abstracts

Meat flavors are substances that give food a meaty or Umami flavor, altering the characteristics of the food substance, namely the chemical senses of taste and smell. The meat flavor can be natural or artificial. Artificial flavoring is the most widely used, in most cases it does not contain any animal source, it is instead made in the laboratory by carefully mimicking the taste and smell of the animal meat. Natural flavoring contains a meat source, and is usually available in the form of broths.
