## **Abstracts**

Medical devices are assets that directly affect human lives. They are considerable investments and in many cases have high maintenance costs. It is important, therefore, to have a well-planned and managed maintenance program that is able to keep the medical equipment in a health-care institution reliable, safe and available for use when it is needed for diagnostic procedures, therapy, treatments and monitoring of patients. In addition, maintenance prolongs the useful life of the equipment and minimizes the cost of equipment ownership.

This report elaborates the market size, market characteristics, and market growth of the Medical Equipment Maintenance industry, and breaks down according to the type, application, and consumption area of Medical Equipment Maintenance. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
