Abstracts

Medical Oxygen Generators are often referred to as oxygen machines, oxygen generators, or O2 concentrators. They provide a cost-effective way for oxygen therapy patients to supplement their oxygen needs without the need of bulky, heavy oxygen tanks. Unlike tanks, concentrators do not run out of oxygen. A personal unit pulls-in regular room air, filters out some of the other gases present and delivers concentrated, medical-grade oxygen.

This report elaborates the market size, market characteristics, and market growth of the Medical Oxygen Generators industry, and breaks down according to the type, application, and consumption area of Medical Oxygen Generators. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Medical Oxygen Generators in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
