Abstracts

Micro Nuclear Reactors (MNRs) are a distinct class of small reactor systems, typically of under 30MW electricity and 100MW thermal output, which are expected to occupy distinct and different market niches, in comparison to larger Small Modular Reactors (SMR's).

Micro nuclear reactors are more flexible and require less maintenance, an advantage of MNRs is their simplicity that allows them to be constructed relatively easily.

This report elaborates the market size, market characteristics, and market growth of the Micro Nuclear Reactors (MNRs) industry, and breaks down according to the type, application, and consumption area of Micro Nuclear Reactors (MNRs). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Micro Nuclear Reactors (MNRs) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
