# **Abstracts**

An optical fiber connector terminates the end of an optical fiber, and enables quicker connection and disconnection than splicing. The connectors mechanically couple and align the cores of fibers so light can pass. Better connectors lose very little light due to reflection or misalignment of the fibers.

This report elaborates the market size, market characteristics, and market growth of the Military Fiber Optic Connectors industry, and breaks down according to the type, application, and consumption area of Military Fiber Optic Connectors. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Military Fiber Optic Connectors in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
