Abstracts

Digital banking means the full digitization of banks and all its activities, programs and functions. It's not just about digitizing your services and products — the front-end that customers see — but also about automating your processes (the back-end) and connecting these worlds with middleware. Digital banking is about the automation of every step of the banking relationship, and it goes way beyond an online or mobile banking platform.

This report elaborates the market size, market characteristics, and market growth of the Mobile Digital Banking industry, and breaks down according to the type, application, and consumption area of Mobile Digital Banking. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Mobile Digital Banking in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
