Abstracts

A mobile virtual network operator (MVNO), a virtual network operator (VNO), or a carrier license (MOLO) such as mobile is a service provided by a wireless network infrastructure without its own wireless communication service provider. MVNO has signed a business agreement with mobile network operators to obtain bulk access to network services at wholesale prices and then set retail prices independently. MVNO can use its own customer service, billing support system, marketing and sales staff, or mobile virtual network enabler (MVNE).

This report elaborates the market size, market characteristics, and market growth of the Mobile Virtual Network Operators (MVNO) industry, and breaks down according to the type, application, and consumption area of Mobile Virtual Network Operators (MVNO). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Mobile Virtual Network Operators (MVNO) in a special period.
