Abstracts

Modular Constructions and modular homes are prefabricated buildings or houses that consist of repeated sections called modules. 'Modular' is a construction method that involves constructing sections away from the building site, then delivering them to the intended site. Installation of the prefabricated sections is completed on site.

Prefabricated sections are sometimes placed using a crane. The modules can be placed side-by-side, end-to-end, or stacked, allowing a variety of configurations and styles.

This report elaborates the market size, market characteristics, and market growth of the Modular Constructions industry, and breaks down according to the type, application, and consumption area of Modular Constructions. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Modular Constructions in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
