Abstracts

Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications.

Multiwall Polycarbonate Sheets. Unlike other glazing materials, multi-wall polycarbonate sheet is virtually unbreakable and provides as much as 60% more thermal insulation than glass. Its light weight, durability, strength and ease of installation make it the ideal glazing material, especially for outdoor applications.

This report elaborates the market size, market characteristics, and market growth of the Multiwall Polycarbonate industry, and breaks down according to the type, application, and consumption area of Multiwall Polycarbonate. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Multiwall Polycarbonate in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
