## **Abstracts**

The biggest difference between NAS (Natural Alternative Sweeteners) and carbohydrates and nutritive sweeteners (sugar derivatives such as xylitol, isomaltulose) is its non-nutrition. Although nutritive sweeteners do not possess the disadvantages of refined carbohydrates leading to dental caries, the absorbability determined by their structure is still difficult to overcome the problem of obesity and metabolic syndrome caused by refined carbohydrates; while NAS structure is often associated with carbon water. Compounds are not related (a few NASs that are sugar derivatives are not absorbed by the intestines), and the body does not get any energy after ingesting NAS, so in theory, NAS does not cause metabolic problems like carbohydrates.

This report elaborates the market size, market characteristics, and market growth of the Natural Alternative Sweeteners industry, and breaks down according to the type, application, and consumption area of Natural Alternative Sweeteners.
