## Abstracts

Traffic Analytics as it applies to the network and security is meant to help IT professionals who need to forensically investigate massive amounts of mostly internally generated logs and flows. Because threat prevention has largely failed in the industry with the gap continuing to widen, network and security analysts are forced to react to events on the network.

This report elaborates the market size, market characteristics, and market growth of the Network Traffic Analytics industry, and breaks down according to the type, application, and consumption area of Network Traffic Analytics. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Network Traffic Analytics in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
