## Abstracts

Object storage, also known as object-based storage, is a type of data storage where each data unit is stored as a discrete unit called an object. Objects can be discrete units, similar to pdf, audio, image or video files. These objects can be virtually any type of data and any size data. All objects in the object store are stored in a single flat address space without a folder hierarchy.

This report elaborates the market size, market characteristics, and market growth of the Object Storage industry, and breaks down according to the type, application, and consumption area of Object Storage. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Object Storage in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
