Abstracts

Ocean freight is usually much slower than air, and customs issues and port holdups can cause additional delays. But ocean freight offers more capacity and value and it has a much better carbon footprint than air freight. Air freight is faster, safer and more reliable than ocean, but also more expensive. Air freight is best used when the cost of shipping is less than 15-20% of the value of the goods.

This report elaborates the market size, market characteristics, and market growth of the Ocean Freight and Air Freight industry, and breaks down according to the type, application, and consumption area of Ocean Freight and Air Freight. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Ocean Freight and Air Freight in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
