Abstracts

The off-grid solar system is completely independent of the grid. This means that for off-grid solar systems, there is no utility company's power as a backup. Typical stand-alone solar systems include solar panels, array DC disconnects, charge controllers, battery banks, system meters, main DC disconnects, inverters, and AC breaker panels. The generator can also be connected to the inverter as a backup power source.

This report elaborates the market size, market characteristics, and market growth of the Off-grid Solar Power Systems industry, and breaks down according to the type, application, and consumption area of Off-grid Solar Power Systems. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Off-grid Solar Power Systems in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
