Abstracts

Open Platform Communications (OPC) is a series of standards and specifications for industrial telecommunication. An industrial automation industry task force developed the original standard in 1996 under the name OLE for Process Control (Object Linking and Embedding for process control). OPC specifies the communication of real-time plant data between control devices from different manufacturers.

This report elaborates the market size, market characteristics, and market growth of the OPC Software industry, and breaks down according to the type, application, and consumption area of OPC Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for OPC Software in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
