Abstracts

Optocouplers are capable of isolating different voltage levels thus safeguarding components from voltage spikes in the same circuit. These components are highly used in automobiles, industrial applications, communication sector and printer & imaging devices among others. The primary purpose of the optocouplers is to isolate or step down from high voltage current to low voltage current. New technologies for isolation are giving rise to high speed, high operating temperature and low input current optocouplers.

This report elaborates the market size, market characteristics, and market growth of the Optocouplers industry, and breaks down according to the type, application, and consumption area of Optocouplers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Optocouplers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
