Abstracts

Pallet rack is a material handling storage aid system designed to store materials on pallets. Although there are many varieties of pallet racking, all types allow for the storage of palletized materials in horizontal rows with multiple levels. Forklift trucks are usually an integral part of any pallet rack system as they are usually required to place the loaded pallets onto the racks for storage.

All types of pallet racking increase storage density of the stored goods. Costs associated with the racking increases with increasing storage density.

This report elaborates the market size, market characteristics, and market growth of the Pallet Rack industry, and breaks down according to the type, application, and consumption area of Pallet Rack. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Pallet Rack in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
