Abstracts

Pallets are horizontal platforms which offer a base for storing, handling, assembling and transporting products and materials. They are a type of tertiary packaging affixed with a superstructure and a bottom. Pallets are portable and easy to handle as they help in simplifying the process of loading and unloading and ensure safe delivery of the product.
This report elaborates the market size, market characteristics, and market growth of the Pallets industry, and breaks down according to the type, application, and consumption area of Pallets. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Pallets in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
