Abstracts

Papain is a natural cysteine proteolytic enzyme present in mountain papaya and papaya. It is native to Latin America and is also called as papaya proteinase I. It is used to tenderize meat eaten as it breaks down tough meat fibers. Papain is an active component in powder form for meat tenderizers and has a huge demand in the global market. Papain also used in chemo-mechanical dental caries removal gel known as Papacarie, as a tooth whitener in mint sweets and toothpaste, to clean up dead tissue in chronic wounds, as a component of many enzymatic debriding preparations, and cell dissociation in cell culture preparations.
This report elaborates the market size, market characteristics, and market growth of the Papain industry, and breaks down according to the type, application, and consumption area of Papain. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
