Abstracts

Payroll outsourcing is the fastest-growing segment of the global human resource outsourcing (HRO) market. Organizations are rapidly adopting payroll services to achieve cost reduction. They either outsource a single process or the entire services to enhance the existing function. Managing payroll in-house involves high costs. Organizations that maintain an in-house team for tasks such as payroll, time and attendance, workforce administration, and benefits administration spend 20% more than organizations that outsource the same functions.

This report elaborates the market size, market characteristics, and market growth of the Payroll Outsourcing industry, and breaks down according to the type, application, and consumption area of Payroll Outsourcing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Payroll Outsourcing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
