Abstracts

A photocopier is an electronic machine that makes copies of images and documents. Photocopiers were once single-function devices. Now, enterprise-grade photocopiers are usually networked and perform multiple functions. They are available in desktop or free-standing models. For home and small business use, photocopying is often bundled with scanning, printing and faxing capabilities in a multifunction peripheral (MFP) device.

This report elaborates the market size, market characteristics, and market growth of the Photocopier industry, and breaks down according to the type, application, and consumption area of Photocopier. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
